DETAILED ACTION

This office action is a response to the after final amendment filed on 1/25/2005.

Examiner's Comment

1. Since generic claims 13 and 26 are allowable, claims 14-24, directed to the method of manufacturing a spin valve sensor, previously restricted from the election of species, are now subject to bring rejoined. Claims 13-24 and 26 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Examiner's Amendment

claimed invention such as after completion of a film making process for forming a first film of two films, which are selected from the first ferromagnetic film, electrically conductive film and second ferromagnetic film and are to be formed successively, but before an initiation of a film making process for forming the other film of the two films, a step of decreasing an anisotropic magnetic field of the spin valve film by interrupting the film making process is introduced. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
